DETAILED ACTION

Election/Restrictions

- Applicant's election has been noted and is being examined accordingly.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-42 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant recites in claim 1 "and optionally one or more fluorescent dye". The term "optionally " is considered to render the claim indefinite since it is unclear if this feature (fluorescent dye) is part of the device. Applicant also recites "optionally" and "possibly" in several other claims of the instant application, these terms should be removed so as not to render the claims indefinite.
3. As best understood the following rejection applies.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2875

5. Claim 1 and 34 rejected under 35 U.S.C. 102(b) as being anticipated by Black et al (3,720,823).

6. Black discloses two fluid-impermeable polymer sheets of the same shape, sealed together at their edges to provide a space for reactants, at least one of said sheets being translucent or transparent; one absorbent sheet (pad) having essentially the same shape as said fluid-impermeable sheets and placed between them in said space; reactants capable of producing chemiluminescent effect, comprising at least one chemiluminescent compound, peroxide, solvent, Separation means that prevents mixing said chemiluminescent compound and said peroxide before wishing to start said effect; and partition means providing that at least one of said reactants does not reach the whole volume of said space during said chemiluminescent effect; wherein said effect is started, and said images are created, by removing said separation means (fig 7, col. 3 lines 48-67 and col. 4 lines 1-26 and 61-67; col. 5 lines 1-9, 62-67). Black et al is considered to anticipate the process claim 34 since the structural limitations are disclosed by Black.

Allowable Subject Matter

7. Claims 2-33, 35-42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
